Solution Fluency adapted from Lee Crockett: 21st Century Fluencies

**Stage 1: Define the problem**
What is it you want to find out?

**Stage 2: Discover**
Do some research? What has already been done by others to solve this problem? What do you know about the problem and its solution? Where can you go to find out what you need to know? (How about the LibGuide? [http://libguides.wilderness.com.au/07aastrology/introduction](http://libguides.wilderness.com.au/07aastrology/introduction))
Stage 3: Dream
What if? Brainstorm lots of different ideas and solutions? Be creative don’t hold back!
Genius exists right next door to crazy 😊

Stage 4: Design
a. How will you go about solving your problem? What will you produce/create? Draw a picture, write a proposal, draw a concept map to explain your design.

b. How will you share your findings?
**Stage 5: Debrief.**

How successful were you in solving your problem? What problems did you encounter? What modifications/changes did you make along the way? If you could travel back in time what advice would you give yourself before commencing?
